Security and performance

- ◆ In thunder raining days, please do not use the mobile phone when charge it or outdoor, so as to avoid being struck by thunder or other injuries.
- ◆ Please do not put the battery in high-temperature environment (high temperature will lead to heat of the battery upgrading), and keep the phone being charged and the charger away from people or other flammable and explosive articles in order to avoid fire, explosion or other dangers!
- ◆ Please strictly adhered to the rules and do shut down the mobile phone on occasions which use of mobile phone is prohibited!
- ◆ Please do not arbitrarily refit or teardown the phone and accessories. Only the authorized organizations can repair the phone.
- ◆ Please do not use batteries, charger or accessories of non-standard original models.
- ◆ Please do not join the two poles of the battery, so as not to result in battery short-circuit.
- ◆ Please do not use the mobile phone when driving. In case of emergency, please use hand-free devices (which may be bought separately).
- ◆ Please do not put the phone on car insurance airbag or region reachable by the airbag after spreading. Otherwise when the airbag expands or ruptures, the mobile phone is likely to cause serious damage to the people in the car due to strong external force.
- ◆ In order to comply with provisions of RF leakage, when you wear a phone or use the data functions, please maintain the distance between the antenna and the body at least 1 inch (2.5 cms).
- ◆ Do not use chemical lotion, scrubbing cleanser to wipe the mobile phone or the charger, otherwise it may damage the components or cause fire. Slightly wet and anti-static soft clean cloth can be used.
- ◆ Please do not throw the old and abandoned lithium batteries into trash can, send them to the designated locations.

◆Please do not use the phone to make bold to camera, video and recording that may infract the rights of the copyright owners. The company will not be responsible for any losses caused by not recording, deleting, destructing or damage of the photos, video and recordings caused by its accessories or software on the use of the functions including camera, video and audio.

◆In the use of network function, if the users download a file with virus, which make the mobile phone cannot be used normally; the company does not undertake any responsibility arising therefore.

Warning: The original manufacturer will not take on any responsibility for the users who are not in compliance with the above advices or improperly use the mobile phone.

Note: The application of value-added services of the mobile phone is provided by relevant service providers. Please refer to the relevant help or providers' notes for detailed information.

Statement: The Company reserves the right to improve the product without making any advance notice, and keeps final interpreting rights on the product performance. Such changes are not notified additionally, your understanding is appreciated.

1 Start Using

1.1 Battery

Battery is attached with the phone. Please recharge it for use after completely using up the battery for the first three times, which makes this battery easier to achieve the best using state.

In actual use, the standby time and talk time of the phone varies with the network status, working environment and different using manners.

For install the battery, you should put the back of the phone upward, push the rear cover ahead, and then take off the rear cover. Then insert the battery in place.

1.2 SIM card

The SIM card is the key for accessing to the digital GSM network. **Prior to using the phone, you need to insert effective SIM card in the phone.**

In order to prevent illegal use, SIM card adopts PIN code (personal identification code) encryption protection.

If this function is selected, PIN code should be input correctly each time when you power on the phone, thus to unlock the SIM card for normal use. Users can disarm the SIM card protection but illegal use of the SIM card cannot be prevented.

If the PIN code input is error for three consecutive times, your SIM card will be locked by the network. There will enquire the PUK code which provided by your network operator. If the PUK code input is wrong for 10 times, the SIM card will be permanently barred.

Note:

Your network operator will set a standard PIN code and you should change it to private password.

1.3 Plug in the memory card

Open the memory card holder, and insert the memory card into the slot at the bottom, then close the memory card holder.

1.4 Plug the earphone

Open the USB cover and insert the connector of the earphone to the earphone jack at the bottom of the mobile phone. Gently pull out the earphone to remove it.

1.5 Status bar and content

In standby screen you can get the information that you need from the indication icons on the screen.

	Indicating the current signal strength of SIM1
	Indicating missed call of SIM1

1.5.2 Text input and edit window

Enter the text input screen, you can short press the ***** key to enter the symbols selecting screen; short press the **#** key to switch input method; long press **#** key to change writing language. There are some input methods preset in your phone; you can select the one which you liked. You can also activate **Options**, to select **Input method** so as to switch the preferred input methods.

2 Dial and answer the call

2.1 Dialing a call

When the network operator's logo appears on the screen, the mobile phone enters into the normal standby state in which you can dial or answer a call. The call quality is relatively largely impacted by obstacles. Therefore, movement in a small range can effectively improve the signal strength.

In the standby screen, input the call numbers or select contact in phonebook, and then press the **Snd** key to make the call.

If the speed dial function is activated, in standby screen, long press the number keys **2-9** to dial the number that has been set up

automatically. If speed dial has not been set for the number key you long pressed, the mobile phone will hint you "No speed dial number".

2.2 Answering a call

If there is a new incoming call when in call progress, the phone will pop up caller screen (call waiting is activated). When you answer the new call, the original call will enter holding status. At this time, you can activate **Options** to select **Swap** to active the original call, and the new call will enter holding status.

Note:

When you are in call progress, the new call to another SIM card can't be dialed in.

If two calls are connected, activate **Options**, and you can operate as follows:

Conference: when making conference call, you can have a talk separately with designated conference participant. In conference call mode, all the others can hear your voice.

Transfer (network support is required): transfer the current call to your designated phone number.

DTMF: on/off settings can be conducted. If the function is activated, when calling the telephone exchange, you can call the extension in accordance with voice clews; the aforesaid functions are unavailable if the function is off.

2.3 Emergency call

If you are in the network coverage area (you can check the network signal strength at the top of standby screen), even without the SIM card, you are also able to make an emergency call.

Note:

The emergency call numbers in different countries or regions are different. Please refer to the local numbers for specific emergency service numbers.

3 Menu operation

In the standby screen, press **LSK** to enter the main menu, you can press navigation keys or corresponding number key to select the function you want to enter.

User profiles	Phonebook	Call center
File manager	Messaging	Services
Organizer	Multimedia	Settings

4 User profiles

User Profiles contains predefined settings for ring tone and volume for each SIM. You can change the existing profiles according to your own preferences. In the standby screen, long pressing the **#** key will quickly activate Silent mode. The headset profile is automatically activated when the earphone is inserted, and all other profiles are automatically disabled.

5 Phonebook

In phonebook list, input the first letter of name, you can search the accordant records. When the record is not empty, activate **Options** you can conduct the following operations: send message, edit, delete, send business card, mark several, in phonebook settings screen, you can set preferred storage, caller groups, speed dial, my number, extra numbers, import contacts, delete duplicated contacts, and you can also view memory status.

14 Common Questions

Unable to make some calls

■ Call barring has been set and barred utilization of the mobile phone. Please check and cancel call barring.

Other person is answering my call

■ The mobile phone has been set into divert your calls to another phone number. Please check and cancel call divert.

The mobile phone cannot search for the network

■ The mobile phone is outside of the network coverage area (or there are physical obstructions between the mobile phone and the transmitter), and calls cannot be made or answered. If you are in one room, please move close to the window.

In the operation process, the mobile phone may display the

following operating tips:

“Emergency”

- You are outside the network coverage area of the service provider. But another network area where you locate allows you to make emergency call according to the signal strength.

“Invalid SIM”

- The SIM card of the mobile phone is locked and the inserted SIM card is unable to be accepted. Please insert the correct SIM card or contact with the vendor.

“Please Enter PUK”

- The SIM card has been locked since the wrong PIN code has been inputted for three times. You must consult your network provider for special PUK code with eight numbers to unlock the SIM card (The PUK code may have been provided with your PIN code at the same time).

Warning:

The SIM card will be permanently locked if you input the wrong PUK code for ten consecutive times and you must apply for a new SIM card from your network provider.

15 Maintenance Guideline

Welcome to use R16. If there is a problem when you using the phone, please contact with the vendor or consult the local maintenance center. If your mobile phone is in need of repair, you can take your phone to local maintenance center, if there is no local maintenance center, please pass your phone and the purchasing invoice to the vendor.

FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg and 2.0W/kg in Europe averaged over one gram of tissue. Device types Discovery has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.61W/kg and when properly worn on the body is 0.795W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.5cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

FCC WARNING

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

Note 1:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the

equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note 2:

Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
